# SEMINAR PROGRAMME

Time	What and who
09:30 	<b>New IP intercom series introduction</b> – <i>Warren Belle</i> Introduction of Aiphone's new IP based intercom system. Seminar will cover the core features and functions, and will introduce potential applications. Time for questions.
10:00 	<b>2018 security technology trends</b> – <i>Steve Ryan</i> 10 technology trends that will shape the Security industry in 2018.
10:30 	<b>Adding value to end users business through the use of AI technology</b> <i>Phil Wring</i> AI is about adopting deep learning technologies to analysis the details of an image to identify and target categories, which enhances the proactive real time alarm efficiency.
11:00 	<b>MAXPRO Cloud</b> – <i>Mat Hewit</i> MAXPRO Cloud is a software platform that incorporates our Galaxy, Access and Video capabilities.
11:30 	<b>Texcom Connect: Defeating the intruder alarm 'grudge purchase'</b> <i>Adrian Mealing</i> Texcom Connect opens a new world of possibilities for Texcom security systems. For too long, security systems have been separated and isolated from the outside world – only providing information when the worst happens, confusing and intimidating the very people who use them and lacking connectivity and compatibility with external systems that could benefit from the intelligence and information contained within.
